COMMISSION

COMMISSION DECISION

of 30 May 1979

amending Decision 77/190/EEC implementing Council Directive 76/491/EEC regarding a Community procedure for information and consultation on the prices of crude oil and petroleum products in the Community

(79/607/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 76/491/EEC of 4 May 1976 regarding a Community procedure for information and consultation on the prices of crude oil and petroleum products in the Community ⁽¹⁾, and in particular Article 7 thereof,

Whereas under the said Article 7 the Commission is to adopt implementing provisions regarding *inter alia* the form, the content, and all other aspects of the communications provided for in Article 1;

Whereas Commission Decision 77/190/EEC of 26 January 1977 ⁽²⁾ provides that the information to be communicated by Member States shall be drawn up according to the model questionnaires set out in the Annex thereto;

Whereas since the adoption of Decision 77/190/EEC experience has shown that it is necessary to improve the Community procedure therein laid down for the provision of information on crude oil prices, that is to say data relating to original grades of crude oil, dates of

loading and the items constituting the price of crude oil and petroleum products, in particular loading and carriage charges,

HAS ADOPTED THIS DECISION:

Article 1

The Annex to Decision 77/190/EEC is amended by the addition thereto of Table 1a, entitled 'Crude oil prices according to the time of loading', annexed to this Decision.

Article 2

This Decision is addressed to the Member States.

Done at Brussels, 30 May 1979.

PRICES OF CRUDE OIL IMPORTED INTO COMMUNITY PORTS ACCORDING TO LOADING DATES

[illegible]

[illegible]

EXPLANATORY NOTES

1. The title 'Types of crude and API°' covers different grades of crude oil. The indication of the API nominal gravity identifies each type of crude oil.
2. Lines 1 to 19, inclusive list the particular types of imported crude oils, excluding those in transit to other Member States or destined for non-member countries. The type designations given are the same as those listed in Directive 76/491/EEC. Line 20 'Other imported crude oils' covers all crude oil imported from non-member countries not shown in lines 1 to 19 inclusive, and those from one other Member State. Line 24 relates to all crudes listed in the table.

For each type of crude listed, two sub-items — (a) and (b) — are each intended to provide information on one of the most representative commercial grades of a crude oil for which there is a price ⁽¹⁾. Sub-item (c) — Others — records the information on other grades so that the three sub-items (a), (b) and (c) cover all the details contained in each of the headings of Table 1 of the Directive.

3. The title 'Monthly quantities landed' covers the details of volume and prices for crude oil imports unloaded during a particular month.

The title 'Quantities loaded during the month' covers the details of volume and prices for crude imports loaded and unloaded during the same month.

The title 'Quantities loaded in the previous month' covers the details of volume and prices for imports unloaded during that month but loaded during the previous month.

The title 'Quantities loaded during second and third month preceding' covers the details of volume and prices for imports unloaded during the month but loaded two or three months before.

4. 'Total quantity loaded' means the grand total of bill of lading quantities of each grade of crude oil imported during the month.

'Quantity loaded' means the total of bill of lading quantities of each type of crude oil loaded during the month concerned for unloading during the appointed month.

The fob prices mean the prices actually invoiced at the port of loading. The fob price is that price actually paid by the undertakings, or that which they expect to pay, after deduction of rebates. Average fob prices are the average monthly quantity-weighted prices applicable at the time of loading. They will be calculated by reference to the most appropriate exchange rates so as to provide the most representative indications of the prices of crude oils. The average monthly dollar exchange rate will be shown at the foot of the table.

'Days of free credit' means the number of days allowed to pay for the oil, i.e. without financial charge.

⁽¹⁾ For example: For line 10: Libya 40°:

Zovetina	42°
Brega	40°
Es Sider	37°
Sarrir	36°
Amna	36°

For line 12: Nigeria:

Nigeria light	37°
Escravos	36°
Nigeria Forcados	31°
Nigeria medium	26°

COMMISSION DIRECTIVE

of 7 June 1979

fixing standard rates of yield for certain inward processing operations

(79/608/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Economic Community,

Having regard to Council Directive 69/73/EEC of 4 March 1969 on the harmonization of provisions laid down by law, regulation or administrative action in respect of inward processing ⁽¹⁾, as last amended by Directive 76/119/EEC ⁽²⁾, and in particular Article 12 thereof,

Whereas the said Article 12 provides that standard rates of yield which are to be applied to all undertakings engaged in a particular type of processing may be fixed on the basis of data previously ascertained, where circumstances so warrant, and in particular as regards processing customarily carried out under clearly defined technical conditions in relation to goods of substantially uniform characteristics resulting in the production of compensating products of substantially uniform quality;

Whereas a detailed examination has made it possible to set apart a certain number of operations for which the conditions of Article 12 of the abovementioned Directive are fulfilled, both as regards the technical conditions under which they are carried out and as regards the uniform characteristics of the goods which are the subject of the operations and the products obtained therefrom;

Whereas standard rates of yield have therefore already been fixed for certain inward processing operations by Commission Directive 72/108/EEC of 1 February 1972 fixing standard rates of yield for certain inward processing operations ⁽³⁾, as amended by Directives 76/681/EEC ⁽⁴⁾ and 78/77/EEC ⁽⁵⁾;

Whereas it is now possible to fix standard rates of yield for certain other inward processing operations;

Whereas the text of Directive 78/77/EEC as published in the *Official Journal of the European Communities* contains certain errors which must be corrected;

Whereas, in the interests of clarity, having in mind the Council resolution of 26 November 1974 on the codification of legal Acts ⁽⁶⁾, the text of Directive 72/108/EEC as a whole should be brought up to date, so that not only those parts which are to be or have been amended but also those parts which remain unchanged may be included in one text; whereas, therefore, the Articles of and Annexes to the said Directive 72/108/EEC, as amended by Directives 76/681/EEC and 78/77/EEC, should be replaced by the Articles and Annex set out in this Directive, which comprise all the provisions with which the Member States must comply;

Whereas the measures provided for in this Directive are in accordance with the opinion of the Committee for Customs Processing Arrangements,

HAS ADOPTED THIS DIRECTIVE:

Article 1

This Directive lays down in column 3 of the Annex the standard rates of yield which the competent authorities of each Member State must apply where inward processing operations relate to goods listed in column 1 and result in the production of the compensating products listed in column 2.

Article 2

If, in applying the standard rates of yield referred to in Article 1, a Member State decides that, in particular

(1) OJ No L 58, 8. 3. 1969, p. 1.

(2) OJ No L 24, 30. 1. 1976, p. 58.

(3) OJ No L 45, 21. 2. 1972, p. 10.

(4) OJ No L 231, 21. 8. 1976, p. 15.

(5) OJ No L 25, 31. 1. 1978, p. 52.

(6) OJ No C 20, 28. 1. 1975, p. 1.

cases, the conditions as referred to in Article 12 of Directive 69/73/EEC which were taken into account when fixing the rates of yield have not been satisfied, the Member State shall inform the Commission, which shall forthwith refer the matter to the Committee for Customs Processing Arrangements.

Article 3

Directive 72/108/EEC shall be repealed with effect from 15 July 1979.

Article 4

1. Member States shall take the necessary measures to ensure that this Directive is applied with effect from

15 July 1979. They shall forthwith inform the Commission thereof.

2. The Commission shall communicate this information to the other Member States.

Article 5

This Directive is addressed to the Member States.

Done at Brussels, 7 June 1979.

(1) The subheadings in this column correspond to those in the Common Customs Tariff. When further subdivision has been necessary this is shown in brackets (). These subdivisions correspond to those used in the Regulations fixing export refunds.

(2) Hulled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(3) Pearled grains are grains corresponding to the definition given in the Annex to Regulation (EEC) No 821/68 (OJ No L 149, 29. 6. 1968, p. 46).

(4) This concerns maize groats and meal:

— of which a percentage not exceeding 30% by weight passes through a sieve with an aperture of 315 micrometres,

or

— of which a percentage not exceeding 5% by weight passes through a sieve with an aperture of 150 micrometres.

(5) For D-glucitol NC of a concentration other than 70% the quantity to be shown is 46.1 kg of D-glucitol per 100 kg of maize.

(6) For D-glucitol C of a concentration other than 70% the quantity to be shown is 40.7 kg of D-glucitol anhydrate per 100 kg of maize.

(7) Pre-cooked rice is constituted by bleached rice in grains undergoing a pre-cooking and partial dehydration intended to facilitate final cooking.

(8) For D-glucitol NC of a concentration other than 70% the quantity shown is 74.1 kg of D-glucitol anhydrate per 100 kg of potato starch.

(9) For D-glucitol C of a concentration other than 70% the quantity to be shown is 65.5 kg of D-glucitol anhydrate per 100 kg of potato starch.

(10) For D-glucitol NC of a concentration other than 70% the quantity to be shown is 74.1 kg of D-glucitol anhydrate per 100 kg of sago starch.

(11) For D-glucitol C of a concentration other than 70% the quantity to be shown is 65.5 kg of D-glucitol anhydrate per 100 kg of sago starch.

(12) For D-glucitol NC of a concentration other than 70% the quantity to be shown is 74.1 kg of D-glucitol anhydrate per 100 kg of manioc starch.

(13) For D-glucitol C of a concentration other than 70% the quantity to be shown is 65.5 kg of D-glucitol anhydrate per 100 kg of manioc starch.

(14) For D-glucitol C of a concentration other than 70% the quantity to be shown is 78.3 kg of D-glucitol anhydrate per 100 kg of white sugar.

(15) Yield fixed for bakers' yeast with a content in the dry matter of 95% obtained from sugar beet molasses brought to 48% of total sugar, or of cane molasses brought to 52% of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22.4 kg of yeast anhydrate per 100 kg of beet molasses brought to 48% of total sugar, or of cane molasses brought to 52% of total sugar.

(16) Yield fixed for bakers' yeast content in the dry matter of 28% obtained from beet molasses brought to 48% of total sugar, or of cane molasses brought to 52% of total sugar. For bakers' yeasts with a different content in the dry matter, the quantity to be shown is 22.4 kg of yeast anhydrate per 100 kg of beet molasses brought to 48% of total sugar or of cane molasses brought to 52% of total sugar.
