COMMISSION REGULATION (EEC) No 2924/83

of 19 October 1983

fixing the export refunds on poultrymeat

THE COMMISSION OF THE EUROPEAN
COMMUNITIES,

Having regard to the Treaty establishing the European
Economic Community,

Having regard to Council Regulation (EEC) No
2777/75 of 29 October 1975 on the common
organization of the market in poultrymeat⁽¹⁾, as last
amended by the Act of Accession of Greece⁽²⁾, and in
particular the first sentence of the fifth subparagraph
of Article 9 (2) thereof,

Having regard to the opinion of the Monetary
Committee,

Whereas Article 9 of Regulation (EEC) No 2777/75
provides that the difference between prices on the
world market for the products listed in Article 1 (1) of
that Regulation and prices for those products within
the Community may be covered by an export refund;

Whereas Council Regulation (EEC) No 2779/75 of 29
October 1975⁽³⁾, lays down general rules for granting
export refunds and criteria for fixing the amount of
such refunds;

Whereas it follows from applying these rules and
criteria to the present situation on the market in poul-
trymeat that the refund should be fixed at an amount
which would permit Community participation in
world trade and would also take account of the nature

of these exports and their importance at the present
time;

Whereas if the refund system is to operate normally,
refunds should be calculated on the following basis:

- in the case of currencies which are maintained in
relation to each other at any given moment within
a band of 2,25 %, a rate of exchange based on
their central rate,
- for other currencies, an exchange rate based on the
arithmetic mean of the spot market rates of each of
these currencies recorded for a given period in
relation to the Community currencies referred to
in the previous indent;

Whereas the measures provided for in this Regulation
are in accordance with the opinion of the Management
Committee for Poultrymeat and Eggs,

HAS ADOPTED THIS REGULATION:

THE COMMUNITY SCALE FOR THE CLASSIFICATION OF CARCASSES OF ADULT BOVINE ANIMALS

Illustrated leaflet

The leaflet 'The Community scale for the classification of carcasses of adult bovine animals' was prepared to illustrate the various conformation classes and fat-cover classes defined in the Annexes to Regulations (EEC) No 1208/81 and (EEC) No 2930/81.

The leaflet contains 20 photographs illustrating on the front the five conformation classes (photographs of the external surface and in profile) and on the back the five classes of fat cover (photographs of the internal and external surfaces), accompanied by the technical descriptions given in the Regulations referred to above. Except for conformation class E, where the photograph represents the lower range of the class, the illustrations correspond to the middle range of the conformation and fat-cover classes. The photographs have been chosen by a group of international experts particularly well qualified in the classification of carcasses of adult bovine animals.

This leaflet is above all a practical instrument for use mainly in the classification of carcasses in slaughterhouses. It is also an illustrated manual for those working in the meat trade. Finally, it can usefully be employed in technical colleges both in the training of meat technicians and for all those who might be concerned with some aspect of meat production or marketing in their future careers.

THE OLD WORLD AND THE NEW TECHNOLOGIES

Michel GODET

Olivier RUYSEN

Preface by Guido BRUNNER

Looking to tomorrow for the action needed today — that is the approach followed by the report *The Old World and the new technologies* in reviewing the crises and issues facing Europe in the economic, energy, industrial and socio-political arenas.

The growing differences between European countries and mounting international uncertainty could in time shake the foundations of the Community. Will Europe's strengths triumph over its weaknesses? On this will depend the decline or resurgence of the old world.

The technological revolutions now under way (in microelectronics, biology and other fields) herald a new era of increasing efficiency and are bound to disrupt completely existing production structures (through automation, decentralization, etc.) and consumption patterns (e.g. new products).

As a result, the appropriate development of technology will be one of the main ways of meeting the challenges of the future. Technological development will be a crucial comparative advantage that Europe must have if it is to determine its own future and pave the way for the necessary changes in our way of life and socio-economic order.

The Old World and the new technologies is one of the first products of an EEC Commission think tank known as FAST (Forecasting and Assessment in the field of Science and Technology). The main task of the FAST programme (run by the Directorate-General for Research, Science and Education) is to identify future problems in the Community in order to guide spending on research and technological development.

The FAST team was set up in 1979 and consists of six research scientists, including the authors of this report, Dr Michel Godet and Dr Olivier Ruyssen.

Michel Godet, Doctor in Economics and in Science is the author of *The crisis in Forecasting and the Emergence of the Prospective Approach* Pergamon 1979, and of *Creative crises*, Hachette 1980.

Olivier Ruyssen, a qualified engineer and a Doctor in Economics, is co-author with Michel Godet of *Les échanges internationaux*, PUF 1978.
