SUB-CONTRACTING TERMINOLOGY

Metal sector — Second edition

The main objective of this terminology is to promote sub-contracting at both national and international level by offering industry in general, and small firms in particular, a harmonized nomenclature enabling them to describe their sub-contracting activities in nine different languages.

It includes definitions of the categories of product, production machinery and main contractor's products with the equivalents in the other languages covered.

This terminology is a useful multilingual technical guide for sub-contractors and main contractors who wish to establish contact. It can also serve as a basic classification for any organization interested in a systematic catalogue of the sub-contracting sector.

The terminology is subdivided into four parts:

Part A: Nomenclature of sub-contract products

Part A is an eight-chapter catalogue of categories of product offered by sub-contractors which can be used to describe the products manufactured by a given sub-contractor and the degree of technical complexity which the sub-contractor can offer.

Part B: Nomenclature of operations and production machinery

This part, likewise divided into eight chapters, is a survey of operations and production machinery used in the sub-contracting sector. It gives some idea of the characteristics of the basic material used, the production methods available and the degree of precision which sub-contractors can offer.

Part C: Nomenclature of main contractor's products

This part is based on the Common Nomenclature of Industrial Products (NIPRO) published by the Statistical Office of the European Communities. It lists the products manufactured by main contractors and identifies the sectors in which a firm has carried out sub-contracting work in the past.

Part D: Company file card

The company file card sums up all the information given in Parts A, B and C in a readily intelligible form designed to allow a choice to be made of the sub-contractors best equipped to carry out a given order. What is more, it gives an idea of the sub-contractor's capabilities, production machinery and experience.

Languages: Danish, German, English, Greek, French, Italian, Dutch, Spanish and Portuguese.
