COMMISSION DECISION

of 7 October 1985

laying down, for the purposes of the surveys on the structure of agricultural holdings for 1985 and 1987, the Community outline of a schedule of tables, the standard code and rules for the transcription on to magnetic tape of the data contained in those tables

(85/502/EEC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

HAS ADOPTED THIS DECISION:

Having regard to the Treaty establishing the European Economic Community,

Article 1

Having regard to Council Regulation (EEC) No 1463/84 of 24 May 1984 on the organization of surveys on the structure of agricultural holdings for 1985 and 1987⁽¹⁾, and in particular Article 8 thereof,

The Community outline of the schedule of tables for the surveys on the structure of agricultural holdings for 1985 and 1987 is set out in Annex I.

Article 2

Whereas pursuant to Article 8 (b) of Regulation (EEC) No 1463/84 Member States are to set out the results of the surveys in the form of a schedule of tables drawn up in accordance with a Community outline; whereas this outline is to be drawn up in accordance with the procedure laid down in Article 12 of the said Regulation;

The standard code and the method of transcription on to magnetic tape of the results referred to in Article 8 (b) and (c) of Regulation (EEC) No 1463/84 are set out in Annexes 2, 3 and 4.

Article 3

Whereas pursuant to Article 8 (d) of Regulation (EEC) No 1463/84 the Member States are to transcribe the results referred to in Article 8 (b) and (c) of the said Regulation on to magnetic tape in accordance with a programme of which is standard for all Member States; whereas the method and programme of transcription are to be drawn up in accordance with the procedure laid down in Article 12 of the said Regulation;

This Decision is addressed to the Member States.

Done at Brussels, 7 October 1985.

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Committee for Agricultural Statistics,

For the Commission

Alois PFEIFFER

Member of the Commission

⁽¹⁾ Optional except for Italy and Greece.

⁽²⁾ Holdings with zero standard gross margin excluded.

⁽³⁾ ESU = European size units.

⁽⁴⁾ Four digit subdivisions are optional for Member States where the number of holdings belonging to these types is regarded as being insignificant.

ANNEX 2

MAGNETIC TAPE SPECIFICATION FOR THE DELIVERY TO THE SOEC OF THE RESULTS OF THE 1985 AND 1987 STRUCTURE SURVEY

1. The information recorded in the Community schedule of tables provided for in Article 6 of Regulation (EEC) No 1463/84 is to be delivered to the SOEC in the following form:
 - (a) on nine-track magnetic tape/1600 BPI, label reference ISO-1001-1979 (implementation level 3);
 - (b) no 'block paddings' should be used;
 - (c) only VOL 1/EOV 1, HDR 1/2, EOF 1/2 of ref. ISO-1001-1979 should be used;
 - (d) for fixed length data records the buffer-offset should be set to zero.

Note:

If, for technical reasons, these specifications cannot be met, special arrangements are to be made with SOEC.

2. The data of individual tables are to be furnished in rows in records of fixed length. Each record shall consist of two parts: identification with six zones (country, region, district, handicapped area status, designation of table, table row number) and information comprising 10 zones of equal length for transcription of a row.
3. Annex 3 gives, for each of the zones of such a record:
 - (a) the number of digits available;
 - (b) the picture in the COBOL programming language appropriate to this number of digits – the meanings of the symbols used for the various pictures are given in paragraph 8;
 - (c) the number of bytes required for this picture;
 - (d) the consecutive numbering of the bytes for the zone in question;
4. Annex 4 gives the codes to be used and the numbers of columns and rows in the various tables.
5. If a table has less than 10 columns, '0' must be entered in the remaining zones of the information part.
6. Records are to be sorted according to the code for the region, and the survey district, the code for handicapped area status, the code for the table and the number of the row (in that order).
7. A block shall be determined by the number of records required for transcription for a given geographical unit of the data contained in all the tables of the Community schedule of tables.

Where a country does not provide information on a complete row or rows of a table (optional characteristics in the regulation on the organization of the surveys for this country), the complete record(s) is/are deleted and the block lengths for that country reduced accordingly.

Where two rows are merged the combined information is entered in the first (lower number) row and the other row deleted.

8. The symbols used in the explanation of the picture have the following meaning:

- '9': storage of numerical value in the available byte (thus, '99' means storage of two numerical values in two bytes);
- 'S9 (9) Comp': storage of a decimal number with up to nine places (with prefix) as a binary fixed point number in four bytes (i.e. in a full word).

DETAILED PROVISIONS FOR THE TRANSCRIPTION OF TABLES OF DATA

	Number of digits	Cobol picture	Number of bytes	Bytes from...to...
Row:				
Identification part				
1. Country	2	99	2	1 - 2
2. Region	3	999	3	3 - 5
3. Survey district	3	999	3	6 - 8
4. Handicapped area status	1	9	1	9
The codes of headings (1), (2), (3) and (4) are established jointly by the SOEC and the Member State concerned				
5. Designation of table (for codes see Annex 4)	2	99	2	10 - 11
6. Row number (1)	3	999	3	12 - 14
Information part (2):				
7. Column element— 1	9	S9(9)Comp	4	15 - 18
8. Column element— 2	9	S9(9)Comp	4	19 - 22
9. Column element— 3	9	S9(9)Comp	4	23 - 26
10. Column element— 4	9	S9(9)Comp	4	27 - 30
