(96/20/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to the Act of Accession of the Republic of Austria, the Republic of Finland and the Kingdom of Sweden,

Having regard to Council Regulation (EEC) No 357/79 of 5 February 1979 concerning statistical surveys of areas under vines ⁽¹⁾, as last amended by Regulation (EC) No 3205/93 ⁽²⁾, and in particular Article 4 (2) and (4), Article 5 (5) and (6) and Article 6 (4) and (7) thereof,

COMMISSION DECISION

of 19 December 1995

concerning a request for exemption lodged by the Federal Republic of Germany pursuant to Article 8(2)(c) of Council Directive 70/156/EEC on the approximation of the laws of the Member States relating to the type-approval of motor vehicles and their trailers

(Only the German text is authentic)

(96/21/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 70/156/EEC of 6 February 1970 on the approximation of the laws of the Member States relating to the type-approval of motor vehicles and their trailers ⁽¹⁾, as last amended by Commission Directive 93/81/EEC ⁽²⁾,

Whereas on 29 June 1995 the authorities of the Federal Republic of Germany lodged a request for approval, by the Commission, of an exemption pursuant to Article 8(2)(c) of Directive 70/156/EEC; whereas this request was accompanied by a report containing the information required by the abovementioned Article 8; whereas this request concerns one type of gas discharge light source to be installed in three types of headlamps intended for use in motor vehicles;

Whereas the information submitted by the authorities of the Federal Republic of Germany shows that the technology and principle embodied in these new types of gas discharge light source and headlamp do not meet the requirements of Community regulations; whereas, however, the description of the tests, the results thereof and the action taken in order to ensure road safety are satisfactory and ensure a level of safety equivalent to that of the lamps and headlamps covered by the requirements of the Directives in force and, in particular, of Council Directive 76/761/EEC of 27 July 1976 on the approximation of the laws of the Member States relating to motor-vehicle headlamps which function as main-beam and/or dipped-beam headlamps and to incandescent electric filament lamps for such headlamps ⁽³⁾;

Whereas these new types of gas discharge light source and headlamp meet the requirements of Regulations adopted by the United Nations Economic Commission for Europe; whereas, this being the case, it is therefore justified to allow vehicles equipped with headlamps fitted with the lamps covered by the request for exemption to benefit immediately from the granting of EEC type approval on condition that the vehicles are equipped with an automatic beam levelling system, a headlamp cleaning

system and a system guaranteeing a permanent dipped beam;

Whereas the Community Directive concerned will be amended in order to enable discharge lamps embodying this new technology and headlamps equipped with such lamps to be placed on the market;

Whereas the measure provided for by this Decision is in accordance with the opinion of the Committee for the adaptation to technical progress of the Directives for the removal of technical barriers to trade in the motor vehicles sector, as set up by Directive 70/156/EEC,

HAS ADOPTED THIS DECISION:

Article 1

The Commission hereby approves the request lodged on 29 June 1995 by the Federal Republic of Germany pursuant to Article 8(2)(c) of Directive 70/156/EEC, for an exemption concerning one type of gas discharge light source to be installed in three types of headlamps intended to be fitted to motor vehicles.

This request is granted on condition that such vehicles are equipped with an automatic beam levelling system, a headlamp cleaning system and a system guaranteeing a permanent dipped beam.

COMMISSION DECISION

of 19 December 1995

concerning two requests for exemption lodged by the Italian Republic pursuant to Article 8 (2) (c) of Council Directive 70/156/EEC on the approximation of the laws of the Member States relating to the type-approval of motor vehicles and their trailers

(Only the Italian text is authentic)

(96/22/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Directive 70/156/EEC of 6 February 1970 on the approximation of the laws of the Member States relating to the type approval of motor vehicles and their trailers ⁽¹⁾, as last amended by Commission Directive 93/81/EEC ⁽²⁾,

Whereas on 4 October 1995 the authorities of the Italian Republic lodged two requests for approval, by the Commission, of an exemption pursuant to Article 8 (2) (c) of Directive 70/156/EEC; whereas these requests contain the information required by the abovementioned Article 8; whereas these requests concern the fitting of three kinds of vehicle with a third stop lamp, as provided for in category ECE S3 by ECE (United Nations Economic Commission for Europe) Regulation No 7 and fitted in accordance with ECE Regulation No 48;

Whereas the reasons stated, whereby the fitting of the stop lamps and the stop lamps themselves do not meet the requirements of Council Directive 76/758/EEC of 27 July 1976 relating to end-outline marker lamps, front position (side) lamps, rear position (side) lamps and stop lamps for motor vehicles and their trailers ⁽³⁾, as last amended by Commission Directive 89/516/EEC ⁽⁴⁾, and of Council Directive 76/756/EEC of 27 July 1976 relating to the installation of lighting and light-signalling devices on motor vehicles and their trailers ⁽⁵⁾, as last amended by Commission Directive 91/663/EEC ⁽⁶⁾, are justified; whereas the descriptions of the tests, the results thereof and their compliance with ECE Regulations Nos 7 and 48 ensure a satisfactory level of safety;

Whereas the Directives concerned will be amended in order to authorize the production and fitting of such stop

lamps; whereas, this being the case, it is therefore justified to authorize EEC type approval for the three kinds of vehicle fitted with the stop lamps covered by these requests;

Whereas the measure provided for by this Decision is in accordance with the opinion of the Committee for the adaptation to technical progress of the Directives for the removal of technical barriers to trade in the motor vehicles sector, as set up by Directive 70/156/EEC,

HAS ADOPTED THIS DECISION:

Article 1

The Commission hereby approves the two requests lodged by the Italian Republic on 4 October 1995, pursuant to Article 8 (2) (c) of Directive 70/156/EEC, for an exemption concerning the production and fitting of a third stop lamp, as provided for in category ECE S3 by ECE Regulation No 7 and fitted in accordance with ECE Regulation No 48, with a view to granting EEC type-approval.

COMMISSION DECISION

of 20 December 1995

laying down the rules for technical and scientific measures concerning the control of classical swine fever and the financial contribution from the Community

(Only the French and Dutch texts are authentic)

(Text with EEA relevance)

(96/23/EC)

THE COMMISSION OF THE EUROPEAN COMMUNITIES,

Having regard to the Treaty establishing the European Community,

Having regard to Council Decision 90/424/EEC of 26 June 1990 on expenditure in the veterinary field ⁽¹⁾, as last amended by Decision 94/370/EC ⁽²⁾, and in particular Article 20 thereof,

Whereas classical swine fever is a serious infectious disease of pigs which creates barriers to trade in live pigs, pigmeat and certain pigmeat products;

Whereas classical swine fever is still present in certain areas of the Community;

Whereas within the framework of Council Directive 80/217/EEC of 22 January 1980, introducing Community measures for the control of classical swine fever ⁽³⁾, as last amended by the Act of Accession of Austria, Finland and Sweden, the Community has adopted measures with a view to the elimination of classical swine fever from its territory;

Whereas to that end the Community is undertaking technical and scientific measures necessary to ensure that existing Community legislation takes into account developments in animal production systems and the development of new diagnostic procedures;

Whereas in this framework provisions should be made for a Community financial contribution to undertake technical and scientific measures on epidemiological aspects of classical swine fever;

Whereas materials and data collected during recent classical swine fever outbreaks in Belgium are available for further analysis;

Whereas Belgium took the initiative to carry out a comprehensive study using materials and information collected during classical swine fever outbreaks experienced during 1993 and 1994;

Whereas in accordance with the provisions of Annex II of Directive 80/217/EEC, Belgium has a national swine fever laboratory which is responsible for diagnostic methods and situated in Brussels; whereas the Community reference laboratory for classical swine fever established in accordance with Annex VI of the said Directive, is situated in Hanover, Germany;

Whereas Community financial aid should be granted to the national swine fever laboratory of Belgium to enable it to carry out further technical and scientific investigations;

Whereas for supervisory purposes, Articles 8 and 9 of Council Regulation (EEC) No 729/70 of 21 April 1970 on financing of the common agricultural policy ⁽⁴⁾, as last amended by Regulation (EEC) No 2048/88 ⁽⁵⁾, should apply;

Whereas the measures provided for in this Decision are in accordance with the opinion of the Standing Veterinary Committee,

HAS ADOPTED THIS DECISION:

Article 1

1. With a view to ensuring that Community legislation on the control of classical swine fever in pigs kept under different husbandry systems is based on the best technical and scientific information available, the Community shall undertake the necessary measures to determine the importance of epidemiological data from recent classical swine fever outbreaks and developments concerning diagnostic procedures.

2. The measures to be carried out shall include a study of:

- (a) epidemiology, in particular, spread of classical swine fever virus upon entrance in pig holdings;
- (b) diagnostic procedures to detect early infections in pigs exposed to classical swine fever virus.
