TITLE 05

AGRICULTURE AND RURAL DEVELOPMENT

Overall objectives

The objectives of the common agricultural policy (CAP) derive directly from the Treaty and are, in particular, to stabilise markets, ensure a fair standard of living in the farming community and guarantee security of supplies.

The CAP has been reformed a number of times since it was first introduced, most recently with the agreement signed in June 2003 in Luxembourg. The key aim of that reform, as part of Agenda 2000, was to shift the slant of the farm economy towards the market in order to make the agricultural sector more competitive. Reflecting the multipurpose application of agricultural activity, the CAP must also be fully compatible with sustainable development, in particular by promoting environmentally friendly production methods and the effective use of resources. Rural development, the second pillar of the CAP, aims at enhancing the competitiveness of rural areas and preserving the environment and rural heritage in order to secure the future of rural areas and promote job maintenance and creation.

In 2005, the priorities for 2004 will be pursued, in particular as regards the implementation of the reforms adopted in 2003 and 2004, the operational application of the *acquis* in the new member countries and the World Trade Organisation (WTO) negotiations. These priorities are in addition to the regular activities of CAP.

COMMISSION

CHAPTER 19 10 — RELATIONS WITH ASIA (cont'd)

Remarks

The purpose of development cooperation under this heading is primarily its contribution to achieving the millennium development goals (MDGs), particularly Goal 1: to halve the proportion of people whose income is less than USD 1 per day and to halve the proportion of people who suffer from hunger before 2015. The MDGs give an overall benchmark for this.

For OECD Development Assistance Committee (DAC) list 1 countries, a benchmark of 35 % of annual commitments is allocated to social infrastructure, mainly education and health, but also including macroeconomic assistance with social sector conditionality. In this context the contribution from the EU budget should be seen as part of overall donor support to the social sector in any given country. A degree of flexibility should be the norm. A benchmark of 20 % of total annual commitments will be allocated to activities in the sector of basic health and basic education, including sectoral budget support to health and education ministries where it is to serve basic health and basic education.

Before July each year, the Commission must submit to the European Parliament and to the Council an annual report on development cooperation. This report must also contain information on how the work of the Commission has contributed to the 35 % target for social infrastructure and in achieving the MDGs. The report should also contain information on the state of donor coordination between the Member States and information on how budget support has contributed to the MDGs. Budget support will depend on prior demonstration of sufficient institutional capacity and compliance with detailed criteria for the custody and use of funds in the recipient country. The criteria must be stated in the annual report, and compliance therewith must be assessed in the report.

After the report has been presented the three institutions will enter into a dialogue on the results and on how further progress can be made towards achieving the objectives.

The cooperation agreements with the Asian developing countries lay down a human rights' clause, failure to comply with which means that the agreements will be suspended. The Commission is called on to be scrupulous in making sure that that clause is complied with by beneficiaries when any project is funded. This appropriation also covers the protection and promotion of children's rights and the integration of children's rights into programming, including in the country strategy papers, national indicative programmes and mid-term reviews.

Remarks

This appropriation is intended to cover measures to initiate the return to a normal life of people in developing countries in the aftermath of critical situations arising out of natural disasters, violent conflicts or other crises. In particular, it will cover the post Tsunami reconstruction aid.

Operations covered will include:

- the relaunch of production on a lasting basis,
- the physical and operational rehabilitation of basic infrastructure, including mine clearance,
- social reintegration, in particular of refugees, displaced persons and demobilised troops,
- the restoration of the institutional capacities needed in the rehabilitation period, especially at local level,
- assisting with the needs of children, particularly rehabilitation of children affected by war, including child soldiers,
- supporting disabled people and disabled people's organisations to ensure that their particular needs are met in the context of rehabilitation operations,
- ensuring that the needs of women, children and older people are taken into account during disaster relief and reconstruction operations,
- raising awareness of the dangers posed by natural disasters and of measures designed to avoid them or to avoid or reduce their consequences.

**Calculation of the uniform call rate for VAT own resources
(Article 2(4) of Decision 2000/597/EC, Euratom):**

Uniform rate (%) = Maximum call rate – frozen rate

A. The maximum call rate is set at 0,50 % for 2005.

**B. Determination of the rate frozen by the correction of budgetary imbalances granted to the United Kingdom
(Article 2(4)(b) of Decision 2000/597/EC, Euratom):**

(1) calculation of the theoretical share of the countries with a restricted financial burden:

In accordance with Article 5(1) of Decision 2000/597/EC, Euratom, the financial contribution of Germany (DE), the Netherlands (NL), Austria (AT) and Sweden (SE) is restricted to a quarter of their normal contribution.

Formula for a country with a restricted financial burden, for example Germany:

Germany's theoretical VAT contribution = [Germany's capped VAT base / (EU capped VAT base – UK capped VAT base)] × 1/4 × United Kingdom correction

Example: Germany

Germany's theoretical VAT contribution = 9 683 287 000 / (48 713 466 000 – 9 378 285 500) × 1/4 × 5 115 150 953 = 314 803 912

(2) calculation of the frozen rate:

Frozen rate = [UK correction – theoretical VAT contributions (D + NL + A + S)]/[EU capped VAT base – capped VAT bases (UK+ D + NL + A + S)]

Frozen rate = 5 115 150 953 – (314 803 912 + 73 329 289 + 35 991 362 + 40 197 704)/[48 713 466 000 – (9 378 285 500 + 9 683 287 000 + 2 255 590 000 + 1 107 085 000 + 1 236 471 000)]

Frozen rate = 0,18564146250792 %

Uniform rate

0,5 % – 0,18564146250792 % = 0,31435853749208 %

TABLE 5

Correction of budgetary imbalances for the United Kingdom for 2004 pursuant to Article 4
of Decision 2000/597/EC, Euratom (Chapter 1 5)

Description	Coefficient ⁽¹⁾ (%)	Amount
1. United Kingdom's share (in %) of total non-capped VAT bases	18,11	
2. United Kingdom's share (in %) of total allocated expenditure	7,23	
3. (1) – (2)	10,88	
4. Total allocated expenditure		84 685 362 853
5. Pre-accession expenditure in the 10 new Member States in 2003 ⁽²⁾		1 713 442 127
6. Allocated expenditure = (4) – (5)		82 971 920 726
7. (3) × (6)		9 024 481 701
8. 0,66 × (7) = initial amount		5 956 157 923
9. Benefit for the United Kingdom ⁽³⁾		820 148 901
10. Basic compensation for the United Kingdom = (8) – (9)		5 136 009 022
11. Windfall gains deriving from traditional own resources ⁽⁴⁾		20 858 069
12. Correction for the United Kingdom = (10) – (11)		5 115 150 953
⁽¹⁾ Rounded figures. ⁽²⁾ This amount is deducted from total allocated expenditure so that expenditure which is unabated before enlargement remains unabated after enlargement. ⁽³⁾ This is the benefit the United Kingdom derives from the present own resources system in relation to earlier systems as a result of the introduction of the GNP/GNI resource and the capping of VAT bases. ⁽⁴⁾ These windfall gains are the benefit the United Kingdom derives from the present own resources system in relation to earlier systems as a result of the increase since 2001 in the percentage of traditional own resources that Member States retain to cover their collection costs.

⁽¹⁾ The base to be used does not exceed 50 % of GNI.

**Calculation of the uniform call rate for VAT own resources
(Article 2(4) of Decision 2000/597/EC, Euratom):**

Uniform rate (%) = Maximum call rate – frozen rate

A. The maximum call rate is set at 0,50 % for 2005.

**B. Determination of the rate frozen by the correction of budgetary imbalances granted to the United Kingdom
(Article 2(4)(b) of Decision 2000/597/EC, Euratom):**

(1) calculation of the theoretical share of the countries with a restricted financial burden:

In accordance with Article 5(1) of Decision 2000/597/EC, Euratom, the financial contribution of Germany (DE), the Netherlands (NL), Austria (AT) and Sweden (SE) is restricted to a quarter of their normal contribution.

Formula for a country with a restricted financial burden, for example Germany:

Germany's theoretical VAT contribution = [Germany's capped VAT base/(EU capped VAT base – UK capped VAT base)] × 1/4 × United Kingdom correction

Example: Germany

Germany's theoretical VAT contribution = 9 540 668 000/(48 931 509 500 – 8 832 022 500) × 1/4 × 5 185 683 679 = 308 450 868

(2) calculation of the frozen rate:

Frozen rate = [UK correction – theoretical VAT contributions (D + NL + A + S)]/[EU capped VAT base – capped VAT bases (UK+ D + NL + A + S)]

Frozen rate = 5 185 683 679 – (308 450 868 + 74 601 411 + 33 818 429 + 39 910 586)/[48 931 509 500 – (8 832 022 500 + 9 540 668 000 + 2 307 490 000 + 1 046 035 000 + 1 234 471 000)]

Frozen rate = 0,182085195550907 %

Uniform rate

0,5 % – 0,182085195550907 % = 0,317914804449093 %

TABLE 5.1

Correction of budgetary imbalances for the United Kingdom for 2004 pursuant to Article 4 of Decision 2000/597/EC, Euratom (Chapter 1 5)

Description	Coefficient ⁽¹⁾ (%)	Amount
1. United Kingdom's share (in %) of total notional non-capped VAT bases	17,8653	
2. United Kingdom's share (in %) of PAE-adjusted total allocated expenditure	7,9423	
3. (1) – (2)	9,9229	
4. Total allocated expenditure		92 293 901 043
5. Pre-accession expenditure (PAE) ⁽²⁾		1 716 810 015
6. PAE-adjusted total allocated expenditure = (4) – (5)		90 577 091 028
7. United Kingdom's correction original amount (3) × (6) × 0,66		5 932 026 743
8. United Kingdom's advantage ⁽³⁾		725 367 786
9. Basic compensation for the United Kingdom = (7) – (8)		5 206 658 957
10. Windfall gains deriving from traditional own resources (TOR) ⁽⁴⁾		20 975 278
11. Correction for the United Kingdom = (10) – (11)		5 185 683 679

⁽¹⁾ Rounded percentages.
⁽²⁾ The amount of pre-accession expenditure (PAE) corresponds to payments made to the 10 new Member States (which joined the EU on 01.05.2004) under 2003 appropriations. This amount is deducted from total allocated expenditure to ensure that expenditure which is unabated before enlargement remains so after enlargement.
⁽³⁾ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resources.
⁽⁴⁾ These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 % to 25 % as of 01.01.2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).

TABLE 5.2

Correction of budgetary imbalances for the United Kingdom for 2001 pursuant to Article 4 of Decision 2000/597/EC, Euratom (Chapter 3 5)

Description	Coefficient ⁽¹⁾ (%)	Amount

8. United Kingdom's advantage ⁽³⁾		212 371 624

10. Windfall gains deriving from traditional own resources (TOR) ⁽⁴⁾		54 179 356
11. Correction for the United Kingdom = (10) – (11)		4 896 335 040
⁽¹⁾ Rounded percentages. ⁽²⁾ The amount of pre-accession expenditure (PAE) is nil for the 2001 UK correction. ⁽³⁾ The 'UK advantage' corresponds to the effects arising for the United Kingdom from the changeover to capped VAT and the introduction of the GNP/GNI-based own resources. ⁽⁴⁾ These windfall gains correspond to the net gains of the United Kingdom resulting from the increase — from 10 % to 25 % as of 01.01.2001 — in the percentage of traditional own resources retained by Member States to cover the collection costs of traditional own resources (TOR).		

Note: The difference of EUR 130 672 532 between the definitive amount of the 2001 UK correction (EUR 4 896 335 040, as calculated above) and the previously budgeted amount of the 2001 UK correction (EUR 5 027 007 572, entered in the SAB 3/2002) is financed in chapter 35 of the PDAB 5/2005. This impact is the so-called 'direct effect' of the UK correction. A supplementary adjustment, to take into account the so-called 'indirect effect' of the UK correction on the uniform rate of call of the VAT-based own resource, is also financed in chapter 35 of the PDAB 5/2005. This 'indirect effect' corresponds to EUR 2 620 769 for the United Kingdom, so that the total amount entered in chapter 35 of the PDAB 5/2005 for the United Kingdom is EUR 133 293 301.

Remarks

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

Under the common organisation of the market in the sugar sector, sugar producers pay basic and B production levies to cover market support expenditure.

However, the application of a ceiling to the levies as provided for in Article 15 of Regulation (EC) No 1260/2001 may lead to their not fully covering the estimated total loss due to the existence of an exportable surplus calculated in accordance with paragraphs 1 and 2 of the said Article. The complementary levy referred to in Article 1 1 6 of this chapter will then have to be paid by sugar producers in accordance with Article 16 of Regulation (EC) No 1260/2001.

Forecasts from 2003 onwards are net figures (without collection costs).

Sugar storage levies

Budget 2005	Amending budget No. 5	New amount
p.m.	—	p.m.

Remarks

This article is intended to record revenue from the outstanding sugar storage levies as Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1) abolished the storage levy.

This article also covers the amounts due pursuant to Article 5 of Commission Regulation (EEC) No 65/82 of 13 January 1982 laying down detailed rules for carrying forward sugar to the following marketing year (OJ L 9, 14.1.1982, p. 14) when the obligation to store sugar carried forward is not complied with and the amounts due according to Council Regulation (EEC) No 1789/81 when the general rules concerning the system of minimum stocks in the sugar sector are not complied with.

Forecasts from 2003 onwards are net figures (without collection costs).

Remarks

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

The common organisation of the markets in sugar provides that isoglucose-production undertakings pay basic and B production levies intended to cover market support expenditure.

However, the application of a ceiling to the levies as provided for in Article 15 of Regulation (EC) No 1260/2001 may lead to their not fully covering the estimated total loss due to the existence of an exportable surplus calculated in accordance with paragraphs 1 and 2 of the said Article. The complementary levy referred to in Article 1 1 6 of this chapter will then have to be paid by isoglucose producers in accordance with Article 16 of Regulation (EC) No 1260/2001.

Forecasts from 2003 onwards are net figures (without collection costs).

Production levy for inulin syrup

Budget 2005	Amending budget No. 5	New amount

Remarks

Council Regulation (EC) No 1260/2001 of 19 June 2001 on the common organisation of the markets in the sugar sector (OJ L 178, 30.6.2001, p. 1).

Continuation of the existing production quota arrangements for sugar requires that similar arrangements be applied to the production of inulin syrup, a direct substitute for isoglucose and liquid sugar, to prevent this product from disturbing a market which, because of the surplus, could further increase the export costs of sugar and isoglucose producers alone.

The common organisation of the market in sugar provides that inulin syrup producers pay basic and B production levies and where necessary the additional levy covering market support expenditure.

Forecasts from 2003 onwards are net figures (without collection costs).

When the Commission considers it necessary to draw on this reserve, it convenes a three-way meeting as soon as possible in order to obtain the agreement of the two arms of the budgetary authority on the need to use the reserve and on the amount required. The reserve is drawn on by means of a transfer to the budget headings concerned.
