(¹) For unit cost number 3 relating to training for self-employment and self-entrepreneurship, the amount will be reimbursed only in the case of group formation of 4 or more students.

(²) The definition of the classes is in accordance with the provisions of Ministerial Circular no. 2 of 2 February 2009. This Circular defines the classes according to the type of teachers providing training.

(³) The young person will be profiled according to one of the four classes (low, medium, high, very high) provided on the basis of the following variables:

- Age;
- Gender;
- Education;
- Employment status one year before;
- Region and Province where the competent body which took in charge the young is based;
- Language skills (only for non-nationals who have not obtained the educational qualification in Italy), for the evaluation of which will be used the already developed methodology for the issuance of an EC residence permit for long-term residents.

Based on the variables identified for the young, a 'disadvantage coefficient' is calculated, with a value between 0 and 1.

(⁴) For unit cost number 8 relating to support for self-employment and self-entrepreneurship, the amount will be reimbursed only in the case of individual or individualised training (meaning a maximum of 3 students)

(⁵) The amounts in table 3.4 are the maximum allowance payable. Where an employer provides an allowance to cover travel, accommodation or meals, the allowance mentioned in point 3.4 will be reduced by:

- the amount mentioned in point 3.1 for travel (depending on location)
- the amount mentioned in point 3.2 for accommodation (depending on location)
- the amount mentioned in point 3.3 for meals (depending on location).

The amounts mentioned in tables 3.1, 3.2 and 3.3. will also be payable in a situation where the beneficiary pays only the categories of allowances mentioned in those tables.

2. Adjustment of amounts

(a) For standard scale of unit costs 1-9, the amounts may be adjusted where the FOI index (consumer price index for blue and white collar worker households, excluding tobacco products) shows a monetary revaluation equal to or exceeding 5 %. In particular, having considered a given year y, the adjustment is made in case in a period y + t the difference between the benchmarking coefficients shown by the FOI index for such years is equal to or higher than 5 %. The base year taken into consideration — and on the basis of which the amounts were adjusted — is 2014. Where this rate is equal to or higher than 5 %, each unit cost may be adjusted accordingly.

(b) For standard Scale of Unit Cost 10, the rate may be adjusted by replacing the montly scholarship and/or social security contributions in the calculation method that consists of monthly scholarship plus social security contributions plus an amount for all other costs. Updated data can be found in amendments to Minister's Decree of 18.6.2008 (which defines the total gross annual amount of PhD scholarships) and biannual adjustment of the rate of social security contributions (Circular letter No 13 of 29.1.2016 of the Director-General of INPS, the National Institute for Social Security).
