THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a) thereof,

Whereas:

- (1) On 11 July 2015, the Codex Alimentarius Commission (CAC) adopted Codex maximum residue limits (CXLs) for mesotrione ⁽²⁾. On 1 July 2016, CAC adopted CXLs for abamectin, acetamiprid, acetochlor, chlorothalonil, cyantraniliprole, cypermethrin, cyprodinil, difenoconazole, ethephon, flonicamid, fluopyram, flutriafol, fluxapyroxad, imazapic, imazapyr, lambda-cyhalothrin, lufenuron, profenofos, propiconazole, pyrimethanil, quinclorac, spirotetramat, tebuconazole, triazophos and trifloxystrobin ⁽³⁾.
- (2) Maximum residue levels (MRLs) are set for those substances in Regulation (EC) No 396/2005.
- (3) In accordance with Article 5(3) of Regulation (EC) No 178/2002 of the European Parliament and of the Council ⁽⁴⁾, where international standards exist or their completion is imminent, they are to be taken into consideration in the development or adaptation of food law, except where such standards or relevant parts would be an ineffective or inappropriate means for the fulfilment of the legitimate objectives of food law or where there is a scientific justification, or where they would result in a different level of protection from the one determined as appropriate in the Community. Moreover, in accordance with point (e) of Article 13 of that Regulation, the Union is to promote consistency between international technical standards and food law while ensuring that the high level of protection adopted in the Union is not reduced.

⁽⁴⁾ Regulation (EC) No 178/2002 of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety (OJ L 31, 1.2.2002, p. 1).

- (4) The Union presented a reservation to the Codex Committee on Pesticides Residues (CCPR) on the CXLs proposed for the following pesticide/product combinations: abamectin (all products); acetochlor (all products); chlorothalonil (all products); cyantraniliprole (milk); ethephon (barley; rye; wheat); flonicamid (all products); flutriafol (brassica vegetables; celery; cucurbits; peppers; pome fruit; products of animal origin); fluxapyroxad (celery; berries and other small fruits; brassica vegetables; brassica leafy vegetables; carrot; fruiting vegetables; cucurbits; garlic; onion; parsnip; shallot); lufenuron (all products); mesotrione (asparagus; bush berries; cane berries; cranberry; mammalian edible offal; eggs; mammalian meats; milks; okra; poultry edible offal; poultry meat; rhubarb; sugar cane); quinclorac (all products) and tebuconazole (sunflower seed).
- (5) CXLs for acetamiprid, cyantraniliprole, cypermethrin, cyprodinil, difenoconazole, ethephon, fluopyram, flutriafol, fluxapyroxad, imazapic, imazapyr, lambda-cyhalothrin, mesotrione, profenofos, propiconazole, pyrimethanil, spirotetramat, tebuconazole, triazophos and trifloxystrobin, which are not listed in recital 4, should therefore be included in Regulation (EC) No 396/2005 as MRLs except where they relate to products which are not set out in Annex I to that Regulation or where they are set at a lower level than the current MRLs. Those CXLs are safe for consumers in the Union ⁽¹⁾.
- (6) In the context of a procedure for the authorisation of the use of a plant protection product containing the active substance spirotetramat on kaki, an application was submitted in accordance with Article 6(1) of Regulation (EC) No 396/2005 for modification of the existing MRLs.
- (7) In accordance with Article 6(2) and (4) of Regulation (EC) No 396/2005 an application was submitted for flutriafol used on cucurbits with edible peel. The applicant claims that the authorised uses of that substance on such crops in the United States lead to residues exceeding the MRLs contained in Regulation (EC) No 396/2005 and that higher MRLs are necessary to avoid trade barriers for the importation of those crops.
- (8) In accordance with Article 8 of Regulation (EC) No 396/2005, those applications were evaluated by the Member States concerned and the evaluation reports were forwarded to the Commission.
- (9) The European Food Safety Authority, hereinafter 'the Authority', assessed the applications and the evaluation reports, examining in particular the risks to the consumer and, where relevant, to animals and gave reasoned opinions on the proposed MRLs ⁽²⁾. It forwarded those opinions to the Commission and the Member States and made them available to the public.
- (10) As regards the uses covered by those applications, the Authority concluded that all requirements with respect to data were met and that the modifications to the MRLs requested by the applicants were acceptable with regard to consumer safety on the basis of a consumer exposure assessment for 27 specific European consumer groups. It took into account the most recent information on the toxicological properties of the substances. Neither the lifetime exposure to these substances via consumption of all food products that may contain them, nor the short-term exposure due to high consumption of the relevant crops and products showed that there is a risk that the acceptable daily intake or the acute reference dose is exceeded.
- (11) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (12) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (13) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

COMMISSION REGULATION (EU) 2017/627**of 3 April 2017****amending Annexes II, III and V to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for fenpyroximate, triadimenol and triadimefon in or on certain products****(Text with EEA relevance)**

THE EUROPEAN COMMISSION,

Having regard to the Treaty on the Functioning of the European Union,

Having regard to Regulation (EC) No 396/2005 of the European Parliament and of the Council of 23 February 2005 on maximum residue levels of pesticides in or on food and feed of plant and animal origin and amending Council Directive 91/414/EEC ⁽¹⁾, and in particular Article 14(1)(a), Article 17, Article 18(1)(b) and Article 49(2) thereof,

Whereas:

- (1) For fenpyroximate maximum residue levels (MRLs) were set in Part A of Annex III to Regulation (EC) No 396/2005. For triadimenol and triadimefon MRLs were set in Annex II and Part B of Annex III to that Regulation.
- (2) For fenpyroximate the European Food Safety Authority, hereinafter ‘the Authority’, submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽²⁾. It proposed changing the residue definition and concluded that concerning the MRLs for citrus fruits, apples, pears, quinces, medlars, loquats, apricots, cherries, peaches, plums, table grapes, wine grapes, strawberries, blackberries, dewberries, raspberries, blueberries, cranberries, currants (red, black and white), gooseberries, rose hips, mulberries, azaroles, elderberries, tomatoes, peppers, aubergines, cucumbers, gherkins, courgettes, beans (fresh, with pods), hops, bovine liver and kidney, sheep liver and kidney and goat liver and kidney some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for tree nuts, kumquats, avocados, potatoes, celeriac, okra, melons, pumpkins and beans (fresh, without pods) no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination. Taking into account additional information on the good agricultural practices provided by the United States after publication of the reasoned opinion, the MRLs for citrus fruits, almonds, apples, pears, cherries and cranberries should be set in Annex II to Regulation (EC) No 396/2005 at the existing level. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation.
- (3) For triadimenol the Authority submitted a reasoned opinion on the existing MRLs in accordance with Article 12(1) of Regulation (EC) No 396/2005 ⁽³⁾. It proposed changing the residue definition and concluded that concerning the MRLs for apples, table grapes, wine grapes, strawberries, blueberries, currants, gooseberries, swedes, turnips, tomatoes, peppers, aubergines, cucumbers, gherkins, courgettes, melons, pumpkins, watermelons, globe artichokes, rape seed, barley grain, oats grain, rye grain, wheat grain, hops, sugar beet, swine muscle, fat, liver and kidney, bovine muscle, fat, liver and kidney, sheep muscle, fat, liver and kidney, goat muscle, fat, liver and kidney, poultry muscle, fat, liver and kidney, cattle, sheep, goat and horse milk and bird’s eggs some information was not available and that further consideration by risk managers was required. As there is no risk for consumers, the MRLs for those products should be set in Annex II to Regulation (EC) No 396/2005 at the existing level or the level identified by the Authority. These MRLs will be reviewed; the review will take into account the information available within two years from the publication of this Regulation. The Authority concluded that concerning the MRLs for bananas, pineapples, okra, Brussels sprouts, leek, buckwheat grain, millet

grain, sorghum grain and coffee beans no information was available and that further consideration by risk managers was required. The MRLs for these products should be set at the specific limit of determination.

- (4) The non-inclusion of triadimefon in Annex I to Directive 91/414/EEC is provided for by Commission Decision 2004/129/EC⁽¹⁾. All existing authorisations for plant protection products containing the active substance triadimefon have been revoked. In accordance with Article 17 of Regulation (EC) No 396/2005 in conjunction with Article 14(1)(a) thereof, the MRLs set out for this active substance in Annex II and in Part B of Annex III to that Regulation should therefore be deleted.
- (5) As regards products on which the use of the plant protection product concerned is not authorised, and for which no import tolerances or Codex maximum residue limits (CXLs) exist, MRLs should be set at the specific limit of determination or the default MRL should apply, as provided for in Article 18(1)(b) of Regulation (EC) No 396/2005.
- (6) The Commission consulted the European Union reference laboratories for residues of pesticides as regards the need to adapt certain limits of determination. As regards several substances, those laboratories concluded that for certain commodities technical development requires the setting of specific limits of determination.
- (7) Based on the reasoned opinions of the Authority and taking into account the factors relevant to the matter under consideration, the appropriate modifications to the MRLs fulfil the requirements of Article 14(2) of Regulation (EC) No 396/2005.
- (8) Through the World Trade Organisation, the trading partners of the Union were consulted on the new MRLs and their comments have been taken into account.
- (9) Regulation (EC) No 396/2005 should therefore be amended accordingly.
- (10) In order to allow for the normal marketing, processing and consumption of products, this Regulation should provide for a transitional arrangement for products which have been produced before the modification of the MRLs and for which information shows that a high level of consumer protection is maintained.
- (11) A reasonable period should be allowed to elapse before the modified MRLs become applicable in order to permit Member States, third countries and food business operators to prepare themselves to meet the new requirements which will result from the modification of the MRLs.
- (12) The measures provided for in this Regulation are in accordance with the opinion of the Standing Committee on Plants, Animals, Food and Feed,

HAS ADOPTED THIS REGULATION:

Article 1

Annexes II, III and V to Regulation (EC) No 396/2005 are amended in accordance with the Annex to this Regulation.

Article 2

As regards the active substances fenpyroximate, triadimenol and triadimefon in and on all products, Regulation (EC) No 396/2005 as it stood before being amended by this Regulation shall continue to apply to products which were produced before 27 October 2017.

⁽¹⁾ Commission Decision 2004/129/EC of 30 January 2004 concerning the non-inclusion of certain active substances in Annex I to Council Directive 91/414/EEC and the withdrawal of authorisations for plant protection products containing that substance (OJ L 37, 10.2.2004, p. 37).

Article 3

This Regulation shall enter into force on the twentieth day following that of its publication in the *Official Journal of the European Union*.

It shall apply from 27 October 2017.

This Regulation shall be binding in its entirety and directly applicable in all Member States.

Jean-Claude JUNKER
